PRODUCT DESCRIPTION:

The NVK 155 pumps are equipped with:

- Adjustable inlet fitting
- Pressure relief valve at the outlet
- Shock mounts

NVK 155 claw compressors create air volume and transfer it through the intake duct to the outlet duct by means of the rotation of two claw shaped rotors in a molded chamber.

The dry-running contact-less rotation of the rotors is synchronized by gears without any lubricant present, thus avoiding any residue generated by friction or rubbing during rotation. The gear wheels themselves are lubricated with oil and are enclosed in two compartments separated from the rotation chamber by gaskets.

NVK 155 Claw Compressor guarantee low operating cost thanks to moderate energy consumption and high efficiency. Maintenance is minimized and the level of performance is maintained for longer by virtue of the lack of friction between the moving rotors.

MAIN APPLICATION FIELDS:

Water aeration, soil remediation, compression conveying systems.

NOTA: Curve riferite alla pressione di aspirazione e temperatura 20°C (tolleranza ±10%)

NOTE: Graph shows inlet pressure at a temperature of 20°C (tolerance ±10%)

NOTE: Graph shows inlet pressure at a temperature of 68°F (tolerance ±10%)

|                          | NVk 155         |
|--------------------------|-----------------|
| Part Number              | 50070984        |
| Voltage                  | 208-230V/460V   |
| Nominal Capacity         | 109.6 CFM       |
| Motor Power              | 8.7 HP          |
| Nominal r.p.m.           | 3300            |
| Noise Level dB(A) (Pump) | 86              |
| Weight                   | 315 Lbs         |
| Pump Intake/Outlet       | 1-1/2" / 1"     |
| Dimensions               | 36" X 19" x 18" |
